Superior Skincare for Every Guest

Your guests deserve the best. Ensure a memorable personal care experience is part of every trip, thanks to our expertly formulated hotel amenities.

A busy travel schedule, often marked by disrupted sleep or changing climates, can put additional stress on the skin – and moments of self-care can be hard to find. Providing your guests with high-quality hotel cosmetics invites them to take time for themselves during even the most hectic day, and enhances the experience of every stay.

Offer gentle and effective products tailored to a wide variety of skin types, including dry and sensitive, thanks to our expertly developed and dermatologically tested collections.

State-of-the-Art Formulations

The health and safety of your guests is our top priority, and every single product we create is rigorously tested to the highest standards. Dedicated to scientific research from the very beginning, we have been developing industry-leading formulations for more than 45 years. Our in-house experts at our manufacturing facilities in Germany, the Czech Republic, and Malaysia are continually researching, testing, and optimizing.

Responsibly Sourced Natural Ingredients

With a focus on plant-based, natural ingredients, all ADA Cosmetics products are pH skin neutral and vegan, while also being free from microplastics and benzophenone-based UV filters. You will never find ingredients of concern, such as parabens, silicones, or formaldehyde donors in our collections – our strict Responsible Sourcing Policy takes care of that.

Certified to the Highest Standards

Don't just take our word for it – many ADA Cosmetics collections have been certified by leading, internationally recognized standards for natural and organic cosmetics, including the Nordic Swan Ecolabel and ECOCERT Cosmos Organic. What's more, we are the only manufacturer of hotel amenities whose core product portfolio is Cradle to Cradle Certified® Silver.

Our Commitment: Clean, Safe Formulations

No parabens

Due to ongoing debate and potential risks, ADA Cosmetics chooses not to use parabens in any product until there is sufficient scientific evidence confirming their safety for consumers.

No mineral oils

Although cosmetic-grade mineral oil is a safe material, we do not use it because of its negative impact on the environment. It is made from non-renewable sources that are only available in limited quantities. While more costly, herbal alternatives offer added skincare benefits such as nourishment and soothing.

No microplastics

Microplastics are washed off the skin and hair and end up in the environment, where they can cause lasting damage to flora and fauna. We avoid both microbeads and soluble microplastics in our newly developed formulas.

No nanomaterials

We do not use nanomaterials in our formulas due to their potential impact on the environment and health.

No MIT and MCIT preservatives

Due to the potential risk of triggering allergies and the debate surrounding these materials, ADA Cosmetics has decided not to use these ingredients in our products.

No silicones

Some silicones contained in cosmetic products are water-insoluble, or do not completely dissolve in water. Therefore, we do not use them.

No benzophenone UV filters

Some filters are suspected of being endocrine disruptors, of polluting surface waters, and of endangering aquatic organisms. Therefore, ADA Cosmetics has decided to proactively remove all types of benzophenone from our formulas. The safety of clients has absolute priority.

No formaldehyde releasers

There are some preservatives that are not formaldehyde themselves, but can release formaldehyde. Although these are permitted for use in cosmetics, we do not use them due to the associated risks.

Conscious Choices, Trip By Trip

Safe. Circular. Responsible.

As the driving force behind sustainable innovation in hotel cosmetics, ADA Cosmetics leads the industry with certified, refillable, and recyclable solutions. We empower you and your guests to make conscious, high-impact choices — to support a better future for all.

Our actions today shape the world we will live in tomorrow. At ADA Cosmetics, our commitment to the environment informs everything we do. We understand the importance of sustainability to you and your guests, and offer amenities that are:

- **Created in line with eco design principles**
- **Easy to recycle**
- **Refillable**

From the very beginning, we have worked to eliminate single-use plastic bottles and therefore reduce plastic waste. Over 35 years ago, we pioneered the first hotel dispenser to support this mission.

Leading in Circularity

We are proud to lead the industry with a core product portfolio that is Cradle to Cradle Certified® Silver. All our strategic products support the circular economy, and meet strict criteria for safe materials, responsible production, and social fairness. We think circular in everything we do – minimizing impact, maximizing sustainability.

Recognized by Green Key International

As a Preferred Vendor of Green Key Global and a recognized partner of Green Key International, ADA Cosmetics supports hotels in achieving high sustainability standards. Our certified, audit-ready amenities simplify compliance and boost your eco credentials – making us a trusted partner for responsible hospitality.

Smart and Sustainable Packaging Solutions

ADA Cosmetics minimizes waste through all phases of the product lifecycle. The RecyClass online tool allows us to assess and improve our packaging, and we have maximized our use of PCR plastic to conserve valuable resources. Our pioneering dispenser solutions save countless small plastic bottles per year. We are also reducing the weight of our packaging and soaps, in order to further reduce material waste and carbon emissions.

Reducing our Carbon Footprint

We have established clear and ambitious decarbonization goals, targeting a 42% reduction in CO₂ emissions by 2030 compared to 2022 levels, and striving to achieve net-zero emissions by 2050. A variety of initiatives in our production facilities around the world contribute towards this goal.

Just one example: all of our cleansing products such as shampoos, shower gels, and liquid soaps are produced using an innovative cold process, eliminating the need to heat large volumes of water. This reduces emissions by up to 45kg of CO₂ per ton of product.

Rooted in Nature

Our vegan products are formulated with gentle, effective, and naturally based ingredients. As part of our strong commitment to animal welfare, no ADA Cosmetics products or ingredients are tested on animals, and we require proof of non-animal testing from our suppliers.

Socially Responsible

We actively support sustainability initiatives including The Ocean Cleanup, which aims to remove 90% of floating ocean plastic by 2040; Canopy, an NGO dedicated to protecting the world's ancient and endangered forests; and Clean the World, which recycles discarded amenities into newly made soaps for communities in need across the globe.

Our annual Sustainability Report tracks our progress towards our goals. ADA Cosmetics is also part of the Advisory Board of Commit for our Planet, an industry-wide initiative to reduce our collective environmental impact. By adopting a transparent and open approach to sustainability, we encourage others to follow our lead.
