THE BOOKLET OF DETAILS

SYNTHETIC
CRYSTAL

Founded in Florence and stimulated by a culturally rich environment towards the aesthetic and harmony conditioning the sensitivity for the love for the old and the fascination for the new. The practical and elegant, crystal and glass looking tumblers made of synthetic materials ranging from acrylic (Synthetic Crystal) to melamine.

Using a style between fusion and pop, but always hand by hand with time, these products represent an optimal solution to the interiors. A convenience coupled with beauty, collection after collection, continues to attract many customers. The collections are enriched each year with new models, adding fantastically shaped objects and colors ranging from white to black, transparent to the brighter colors.
